

MAIN CONTROL BOX -CONFIGURATION Pro-Comm model beds

4 CHANNEL - Pro-Comm style beds

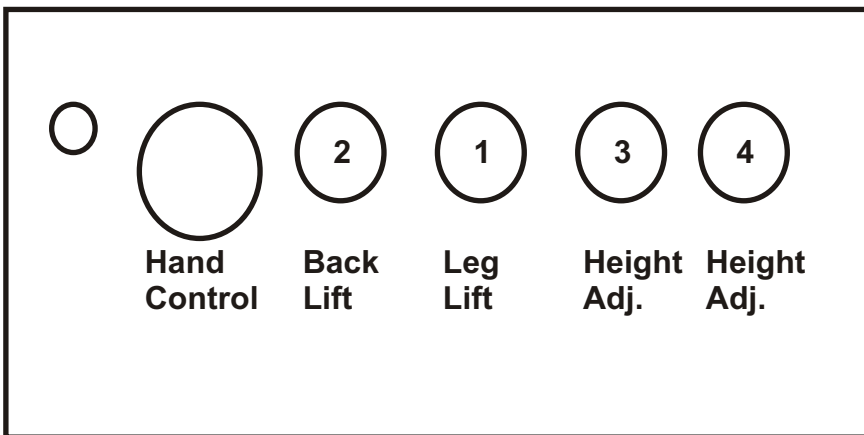

MARK 1 (to bed Serial No: 030999)

4 CHANNEL HAND CONTROL UNITS

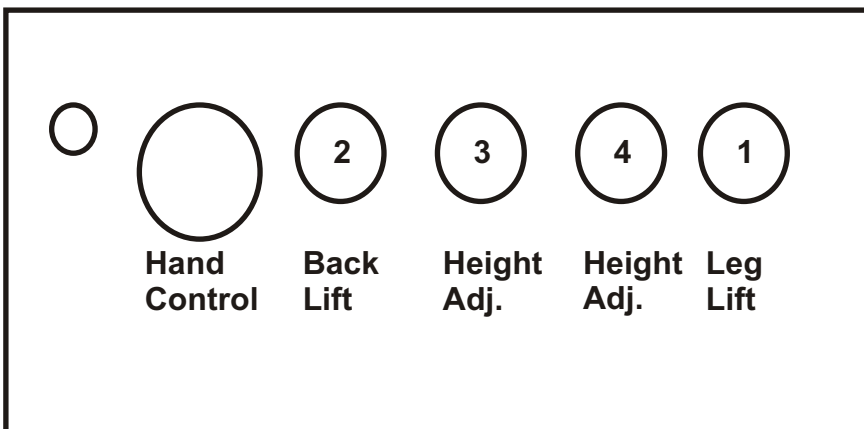

If fitting one of the latest style 4-channel hand control units to a 4-function bed with the earlier Mark 1 Main Control Box then it will be necessary to adjust the actuator plug configuration to match the Mark 2 box shown.

MARK 2

NOTE that in some instances it may be necessary to connect all 4 actuator plugs **BEFORE** any function will operate.

MARK 3 (2007 current)

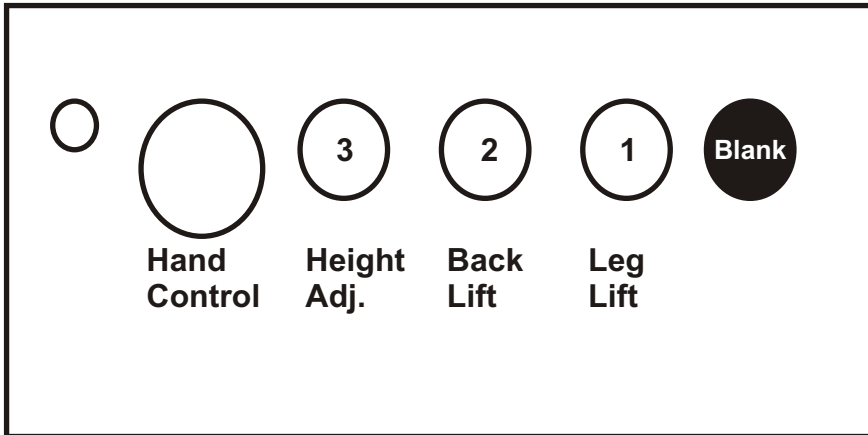

MAIN CONTROL BOX -CONFIGURATION Pro-Care model beds

3 CHANNEL - Pro-Care style beds

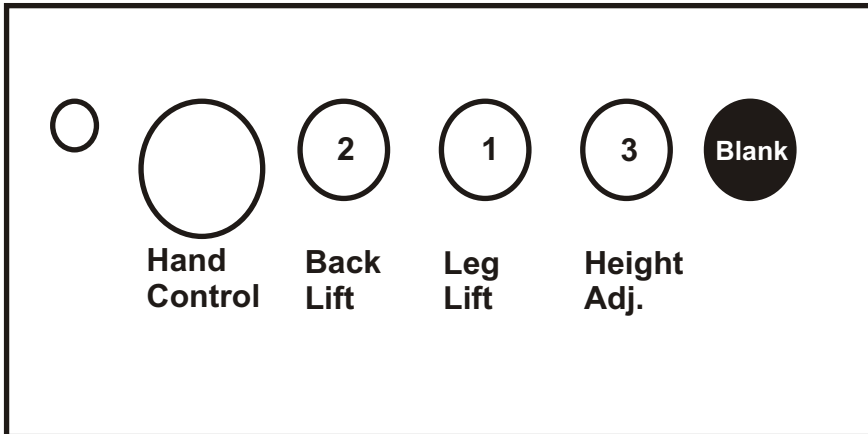

MARK 1 (to bed Serial No: 030999)

3 CHANNEL HAND CONTROL & MAIN CONTROL UNITS

If fitting a replacement Hand Control or Main Control box to an earlier model 3-function bed then it may be necessary to alter the actuator plug configuration to ensure that the button presses are matched to the selected bed function. **NOTE:** on Mark 2 & Mark 3 versions the 'spare' socket is blanked using a removable insert (on Mark 1 versions there is no spare socket).

MARK 2

NOTE that in some instances it may be necessary to connect all 3 actuator plugs **BEFORE** any function will operate.

MARK 3 (2007 current)
